Haoma Mining Shareholder Update

Elazac Process test-work estimates 46.61g/t gold in 'low grade' Mt Webber iron ore

- 1) Directors are pleased to advise Haoma shareholders that after processing 33.8 kg of '**low grade Mt Webber iron ore**' a **sub-sample** was taken and a **doré button containing 8.2% gold was recovered**. Mt Webber is presently mined by Atlas Iron Limited which is 100% owned by the Hancock Prospecting Group.

This 'calculates back' to **46.61g/t gold in the 33.8 kg sample of 'low grade Mt Webber iron ore' processed**.

- 2) Management at Bamboo Creek is continuing to 'fine-tune' the leaching of gold from the Bamboo Creek Vat which contains about 28,000 tonnes of crushed Kitchener Low Grade ore.

Directors expect to be able to advise shareholders in about 2 weeks on gold grade recovered from Vat leach solution.
