#10

50 Hottest Projects
in the Bioeconomy

Licella, Canfor (Arbios)
Commercial biocrude project
Prince George, British Columbia

On Day 2 of ABLC in Washington, DC, [The Digest announced the 50 Hottest Projects in the Advanced Bioeconomy 2022](https://biofuelsdigest.com/bdigest/2022/03/17/50-hottest-projects-in-the-advanced-bioeconomy-2022/). This year, the focus was on advanced bioeconomy manufacturing sites, completed or in development, at pilot, demonstration or commercial scale for intermediates or finished products, rather than companies.

The commercial project in Prince George under Licella's joint-venture with Canfor, Arbios Biotech, was voted #10 in the 50 Hottest Projects among a highly competitive field.

Licella's Senior VP Business Development Americas, Dr Alan Del Paggio, was invited to speak at ABLC on behalf of Licella and discussed Arbios' commercial project in Prince George.

For more information on the project and Arbios, please visit the [Arbios Biotech website](https://www.arbiosbiotech.com/).
